

## Benjamin James (BJ) Fulton

NASA Exoplanet Science Institute / IPAC-Caltech  
Research Scientist / NN-EXPLORE Project Scientist

(408) 528-4858

[bjfulton@ipac.caltech.edu](mailto:bjfulton@ipac.caltech.edu)  
[www.benjaminfulton.com](http://www.benjaminfulton.com)

### Research Interests

I strive to understand Earth's context in the galaxy through the detection, characterization, and demography of exoplanets. I push the radial velocity detection method to the limit through advanced analysis techniques, observational strategies, and hardware optimization.

### Education

- 2017 - Doctor of Philosophy in Astronomy from the Institute for Astronomy at the University of Hawaii, Manoa
- 2014 - Master of Science in Astronomy from the Institute for Astronomy at the University of Hawaii, Manoa
- 2009 - Bachelor of Science in Physics with a Minor in Astronomy and Planetary Science from the University of California, Santa Barbara

### Professional Appointments

<b>Research Scientist / NN-EXPLORE Project Scientist</b>	NASA Exoplanet Science Institute / Caltech / JPL	April 2018 – present
<b>Texaco Postdoctoral Fellow</b>	California Institute of Technology	August 2017 – April 2018
<b>National Science Foundation Graduate Research Fellow</b>	Institute for Astronomy, University of Hawaii	August 2014 – August 2017
<b>Graduate Research Assistant</b>	Institute for Astronomy, University of Hawaii	August 2012 – August 2014
<b>Research Associate (Astronomy)</b>	Las Cumbres Observatory	March 2009 - August 2012

### Publication statistics

- **10 first author & major contributions in 8 second author refereed publications**
- 204 total refereed publications
- Contributions to 4 *Nature* publications
- 10034 citations (1562 citations to first-author papers)
- h-index = 52

### Research Experience

- Lead for the Keck Planet Finder (KPF) data reduction pipeline that will be an open-source toolkit to convert high-resolution optical spectra into extremely precise RVs for and other similar instruments
- Directed a study to analyze over 30 years of radial velocity data to determine the frequency of giant planets beyond 5 au ([Fulton et al. 2021](#)).
- Discovered a gap in the radius distribution of small planets found by *Kepler*. This has significant implications for our understanding of the formation and evolution of planets smaller than Neptune ([Fulton et al. 2017](#))
- Served as project scientist for the [NN-EXPLORE program](#), primarily overseeing the development of the pipeline and archive for the [NEID spectrograph](#)
- Developed an open source software package for the analysis of radial velocity time-series data written in object-oriented Python ([radvel.readthedocs.io](http://radvel.readthedocs.io))
- Wrote software that allows the Automated Planet Finder (APF) telescope at Lick Observatory to operate autonomously. APF has been collecting high-precision radial velocities every night for the past 9 years.
- Development of the "Jump" target management database and web application used by the California Planet Search team, which honed my skills in Django, Javascript, CSS, Haml, and Docker ([jump.caltech.edu](http://jump.caltech.edu))
- Developed a new technique to extract radial velocities from low signal-to-noise spectra which enabled the discovery of the Jupiter-size transiting exoplanet KELT-8b ([Fulton et al. 2015b](#))
- Published [Fulton et al. 2015a](#), and [Fulton et al. 2016](#) announcing the discovery of 5 new low-mass planets orbiting four nearby stars. These discoveries were made possible, in large part, by the APF facility.
- Published a paper ([Fulton et al., 2013](#)) for which I modeled the Rossiter-McLaughlin (R-M) effect to measure the stellar obliquity of HAT-P-17. I ported/adapted an existing Differential Evolution Markov Chain Monte Carlo code from IDL to Python, and wrote the model calculation code from scratch to take advantage of a new semi-analytical model of the R-M effect.
- Developed an automated planet detection algorithm to search for the signatures of planets in heterogeneous radial velocity datasets and characterize pipeline detection efficiency using injection-recovery tests ([Howard & Fulton 2016](#))

## Academic Awards

- 2018 - Robert J. Trumpler award from the Astronomical Society of the Pacific for a PhD thesis considered particularly important to astronomy
- 2017 - Texaco prize postdoctoral fellowship at Caltech
- 2016 - ARCS Foundation Honolulu Scholar of the Year
- 2016 - Columbia ARCS Award in Astronomy
- 2015 - Student Excellence in Research Award at the University of Hawaii at Manoa
- 2014 - National Science Foundation Graduate Research Fellowship
- 2009 - Physics Research Honors award upon graduation from UC Santa Barbara

## Student Mentoring

- **Spencer Hurt, Harvard Undergraduate (2019-present)**  
Spencer contributed greatly to the RadVel Python package by optimizing it for speed, documentation, and modularity to ease community contributions. He is now applying it to the Gl 411 system to perform a detailed characterization of the system of planets orbiting the 4<sup>th</sup> closest star to the sun ([Hurt et al. 2021](#))
- **Cayla Dedrick, Caltech Undergraduate (2018-present)**  
Cayla adapted and improved upon my algorithm for automated detection of planets in radial velocity data and used it to discover two planets straddling the habitable zone of a nearby star ([Dedrick et al. 2021](#))
- **Lee Rosenthal, Caltech PhD Candidate (2018-present)**  
Lee expanded on the automated planet detection code developed by Cayla Dedrick and turned it into a publicly available open-source Python package. He used this to discover ~25 new planets in Keck/HIRES radial velocity data as part of a large program to measure the demographic properties of long-period gas giant planets. I'm currently serving as co-advisor with Andrew Howard. ([Rosenthal et al. 2021](#), [Fulton et al. 2021](#), and [code release](#))
- **Ilya Sherstyuk, Caltech Undergraduate (Summer 2019)**  
Ilya developed an algorithm to analyze stellar activity indicators to distinguish between planets and stellar rotation signatures in radial velocity datasets

## Teaching Experience

- 2020 - Designed and helped to build and instruct the hands-on activities for the online 2020 Sagan Summer Workshop
- 2015 - Designed curriculum and instructed "Introduction to Astronomy" summer course at the University of Hawaii at Manoa
- 2015 - Designed and lead a "Python for Astronomers" seminar at the University of Hawaii
- 2012-2015 - Lectured and advised students during the annual HiSTAR program for K-12 students in Hawaii

## Invited Talks

- 2021 - Seminar speaker at Princeton (virtual)
- 2021 - Seminar speaker at MPIA in Heidelberg, Germany (virtual)
- 2021 - Invited speaker at the Sagan Summer Workshop in Pasadena, CA (virtual)
- 2020 - Colloquium speaker at University of Chicago in Illinois
- 2019 - Colloquium speaker at Stanford, CA
- 2019 - Review speaker for the Greater IPAC Science Symposium in Pasadena, CA
- 2018 - Colloquium speaker at Lowell Observatory in Flagstaff, Arizona
- 2018 - Center for Space and Habitability Colloquium speaker at Universität, Bern, Switzerland
- 2018 - Planetary Science / IPLEX seminar speaker at the University of California, Los Angeles
- 2017 - Panelist on occurrence rate panel at the ExoPAG16 meeting
- 2017 - FLASH seminar speaker at the University of California at Santa Cruz
- 2016 - Seminar speaker at the Center for Habitable Worlds at Penn State University
- 2013 - Public talk at a conference of The American Congress of Obstetricians and Gynecologists

## Conferences and Meetings

- 2020 - Contributed talk at the Exoplanets III virtual conference
  - 2020 - Served on the Science Advisory Committee for the online 2020 Sagan Summer Workshop
  - 2019 - Contributed talk at the Extreme Solar Systems conference in Reykjavik, Iceland
-

- 2019 - Contributed talk at the Extreme Precision Radial Velocity Conference in Grindelwald, Switzerland
- 2019 - Contributed talk at the Kepler and K2 Science Meeting in Pasadena, California
- 2019 - Attended the Telluric Hackathon in New York City, New York
- 2018 - Contributed talk at the Keck Science Meeting in Pasadena, California
- 2018 - Contributed talk at the ExSoCal 2018 conference in Pasadena, California
- 2018 - Contributed talk at the Exoplanets II conference in Cambridge, UK
- 2017 - Co-Chair of “observing strategy” session at the Extremely Precise Radial Velocities III conference at Penn State
- 2017 - Poster at the Extremely Precise Radial Velocities III conference at Penn State
- 2017 - Contributed talk at the Kepler & K2 SciCon IV
- 2017 - Contributed talk at the 2017 Aspen Winter Conference: Formation and Dynamical Evolution of Exoplanets
- 2016 - Poster at the Exoplanets I conference in Davos, Switzerland
- 2015 - Poster at the Extreme Solar Systems III conference in Waikaloa, HI
- 2015 - Poster at the Sagan Workshop in Pasadena, CA
- 2015 - Poster at the Extreme Precision Radial Velocity workshop in New Haven, CT
- 2014 - Poster at the Toward Other Earths II conference in Porto, Portugal
- 2014 - Poster at the Sagan Workshop in Pasadena, CA
- 2014 - Poster at the Exoplanetary Science conference in Quy Nhon, Vietnam
- 2013 - Poster at the Kepler Science Conference II in Mountain View, CA
- 2013 - Poster at the American Astronomical Society Winter Meeting in Long Beach, CA

## Observing Experience

- ~100 full or partial nights using the HIRES instrument on the Keck I telescope located on Maunakea
- ~800 nights on the Automated Planet Finder Telescope at Lick Observatory (mostly robotic running on my software)
- Approximately 20 nights using the OPTIC imager on the University of Hawaii 2.2 m telescope located on Maunakea
- Approximately 7 nights on the Nickel 1.0 m at Lick Observatory
- Approximately 180 nights on the Sedgwick telescope of the Las Cumbres Observatory network (mostly robotic running on my software)

## Proposals

- 2021 - ROSES EPRV – Astrophysical and Heliophysical Perspectives of the Sun as a Star – not selected

## Hobbies and Interests

- Motorsports
  - 2020 - 3<sup>rd</sup> in the Porsche Owners Club Sim Racing Championship
  - 2018 - SCCA San Diego Match Tour STU class win
  - 2016 - 2018 - SCCA regional STU class champion
- Digital photography, including astrophotography (Astronomy Picture of the Day, 08/26/2011 <http://apod.nasa.gov/apod/ap110826.html>)
